Date: 30th June 2023

[Download](#) Version 1.509

New Features

- **BT Scheduler** - When a user drags a task and drop it to change its dates then it will automatically shift that tasks child accordingly.

Fixed Issues

- **BT Scheduler** - Now users can change Dates of task using drag and drop feature or directly editing the dates from the list of tasks shown in the scheduler on click of save changes button.
- **Quote - Search on Product Field** - Initially, In this release, the product name search functionality was not working accurately. However, with the latest update, it now searches for all combinations of letters properly.
- **Budget - New Scroll bars are too dark** - Changed the scroll bar color and its width to make it look like a standard scrollbar.

Improvements

- **RFQ Email Template 2** - In this release we introduce a new design for Thank You RFQ email template when vendor Accept RFQ.
- **RFQ Awarded Email Template** - In this release we introduce a new design of email template when RFQ is awarded.
- **Quote- Clearing out the Description Field:** This improvements allowses users to making description field empty when product field is empty on single quote line entry.
- **Project - Create Sales Invoices Button:-** This improvements allowses users to Create Sales Invoices with ease from Project Record page itself.
