[Download](#) Version 1.510

New Features

- **Purchase - New Vendor Review Button-** In this release now user can create Vendor Review record from purchase Order record page itself.
- **Sales Invoice - Emailing needs to keep track of the Activity and Document that was emailed** - Added the functionality in Sales voice so that whenever an email is sent it will be shown in activity with the document attached to it.

Fixed Issues

- **Budget** - Now when user change the Pricebook from Budget, Drop down list always contains the None option at the top of picklist like Quote.
- **Budget** - Now when user able to search the Products that are not assigned to Pricebook and Product Family.
- **Quote** - Now when user able to search the Products that are not assigned to Pricebook and Product Family.
- **Budget - View Budget Line Button** - Now hyperlink from where user redirect to Budget is aligned at left and by clicking it user is redirect to that particular Budget.
- **BT Contract** - Now when user open contract record page Total of contract lines is aligned Properly.
- **Purchase Order - Import Vendor Reviews Button** - Now when user clicks on the Import vendor review button they will not error and they can successfully import vendor review records from Purchase Order.
- **Sales Invoice - Send Email button** - Solved the spinner issue that is coming while clicking on send email button and the upload file size is larger than the max limit.

- **Budget - View Budget Lines page needs updated** - Removed the unwanted white space from the View Budget Lines tab.
- **Budget - Screen resolution fix. 1920x1080 should have to scroll down** - Removed the scroll bar and make the screen static for screen Resolution of 1920x1080.
- **Quote PDF** : When admin accepts any quote from Customer View on the record page of Quote, it will still create PDF and attach it with that Particular quote (We have fixed the issue of failure mails which were coming out to the users when Email Class fails)
